

## V. THE MOST HORRIFIC ILLNESSES AND WHAT CASUES THEM

Lets start with listing these top diseases:

1. Cancer
2. Lyme Complex
3. VHF's
4. Retro Viruses
5. Echinococcus (Tumour like parasite)
6. Dementia / Alzheimer
7. Morgellons
8. MND / ALS

This is basically the list of diseases which are the most horrific and fast acting in some instances.

What is the most horrific thing about most of them: Number One - they are allegedly incurable. And Number Two - they are denied to ever exist or to be as common as they are.

These are the most common diseases keeping our numbers on this planet down.

# 1. CANCER

Lets start with this then - 1939 Cancer Act. If you have read the story of Royal Raymond Rife you should know this simple fact - 1938 and 1939 years were the time when all those worshipping Rife in America were bribed by Big Pharma to deny ever knowing him.

And at exact same time the law was introduced in USA, UK and many other countries which basically says:

**Unless you are medically qualified you cannot advise, diagnose or treat cancer. (you should read - unless you are Big Pharma approved)**

Is this a coincidence? This is simply a rhetorical question.

This book alone is a testimony that with magnetism we can blast any pathogen we want. So why are we not doing it?

Who and how controls millions of scientists? It is the same story with Cancer.

Introduce Law that will stop alternative disapproved researchers from finding the cure and no progress will be made.

So lets analyse a few facts again:

- Huge share of cancer cases are caused by the cancer virus isolated by Rife back in early 30's.
- Rife cured all terminally ill patients with cancer using his equipment.
- To cure cancer all you should need to do is to destroy the virus and the body will recover back to normal.
- The law introduced back in 1939 was simply designed to stop the cure invented by Rife.
- Till now we continue with chemo which has 3% efficacy. Chemo is nothing but mustard gas. This is insanity.

- Perfectly healthy people are diagnosed with cancer mainly through use of parasites to prove that chemo drugs have higher efficacy than 3%
- Statistically 1 in 3 people have cancer virus. This is how many people die from cancer.
- Where do we get cancer virus from - vaccinations. Obviously there is nothing wrong with vaccinations except the food that is used to develop any strain of any pathogen comes often contaminated.
- Vaccinations are not only contaminated with cancer virus but with many other pathogens, chemicals and nano technology. Some of them are introduced within the vaccine on purpose.
- Look at the volume of vaccinations we are forced to have. 100 years ago only about 1 in 25 people used to die from cancer. To day this number is 1 in 3. Soon 1 in 2. Why - compulsory vaccination programmes. Australia became very recently a country where if you do not vaccinate your children you cannot send them to school.
- Nothing about finding the cure for cancer points at the virus identified by Rife. Why? Because we would do everything to find drugs to destroy viruses. And since we look in a wrong place no focus will be placed on viruses.

## 2. LYME COMPLEX

I do not know how much you know about Lyme Disease, but probably the starting point to this conversation is to label this disease as Complex!

Because Lyme is not caused by *Borrelia Burgdorferii* alone. Lyme is not caused by one or two co-infections on top of it.

What you discover below is what every person with Lyme has as a co-infection. Without exceptions! Name me a liar - but that is how things are.

So testing for multiple co-infections with whatever means is pointless. Once one of the main Lyme co-start is present it practically guarantees you have all the rest.

Wasting money on highly inaccurate testing is obviously your choice. But out of my 200 cases of Lyme Complex all 200 had identical spectrum of co-infections.

Get tested for Babesia and Borrelia at most and then you can presume you have at least another 95% of what you will find below.

The most important thing to mention here is: you cannot eliminate Lyme Complex with antibiotics. The simple reasons are the Babesia, Malaria and the full range of Viral Haemorrhaging Fevers. These are just some examples:

- > Ebola,
- > Karelian Virus
- > Marburg
- > Sabia,
- > Japanese Encephalitis
- > West Nile
- > Yellow Fever

.....

Just simply look below.

I find it incredibly boring topic since with one single frequency you can eliminate every single coinfection of Lyme Complex.

What you must also remember is - there are types of parasites which can mimic Lyme Complex. And if you have both you are most likely bed ridden.

The critical thing in Lyme treatment is to tackle parasites first. What very few people understand that it is a very easy thing to establish when Lyme Complex has been eliminated. The confirmation can be done in USA with PCR testing which is relatively highly accurate.

You can zap all of Lyme and think whatever you have applied didn't work. And here we come - you simply have Trichinella on top of it!

One final thing to highlight is - at least 1 in 7 people have Lyme disease (2019/20). The easy way to recognise this fact are all forms of neurological diseases.

The two other methods are loss of hair in women and vitiligo.

Vitiligo is caused by Tularaemia which is always a coinfection of Lyme Complex. However - Tularaemia can exist on its own and it can lead to loss of pigmentation of the skin. Loss of pigmentation does not guarantee you have Lyme Complex.

### 3. VHF's - Viral Haemorrhaging Fevers (Viruses)

The two most important things to say about this infections are:

- All Lyme Complex cases carry a strain or two of these viruses. 99.9% probability based on Vega Testing.
- Like Vaccinations - VHF's have been engineered or weakened so they can work in much longer time - e.g. decades to grind you down. And if you mentioned to your doctor you might have Ebola virus you would be ridiculed. And prequalified under Mental Health Act.

To summarise the above - at least 1 in 5 people have a VHF or more. I would like to say 1 in 2 will have contracted this virus at some point in life.

You also need to remember that any insect can carry any form of any bacteria or virus. Any bite - even hotel bed bugs - almost guarantee you will have contracted something very nasty.

VHF's are designed to turn you like Lyme complex into a hypochondriac. So you can be prescribed as many drugs as possible. And this virus is almost guaranteed to be ever looked into.

This sort of infection will disintegrate your organs over many years leading to a heart attack, kidney failure or similar.

## 4. Retro Viruses

This is something nobody say even one word about.

And yet practically every person is infected with at least one strain of this viruses.

How do I know - at some point I began testing every single person for Retro Viruses. The outcome - unless you are young and in great shape you may be clean. But to my shocking discovery - at least 95% of population in their 20's or above are positive with dormant retro virus.

Now - the question is where do we get them from? The answer is very simple - and this is not my imagination. There are dozens of sources on the internet saying that vaccinations had been and almost certainly are contaminated with all sorts of pathogens. Retro viruses are one of many nasty infections you can contract when having a jab.

Remember - there is nothing wrong with vaccinations except the food used in production (e.g. monkey organs) come with all sorts of hidden pathogens. And what comes in food cannot be sterilised. And these are just many issues which nobody makes nobody aware with these facts.

And over the years as your immune system becomes weaker the viruses become more and more active. This obviously leads to a viscous circle in terms of immunity. Out of control process leading to fast medical dependence.

And this is what the medicine is about. Make people addicted to drugs and make sure they do not live too far beyond retirement age.

And remember - the more money you spend on chemo drugs the less you will leave to your family and children. This is rather very simple to analyse. Is't it?

## 5. Echinococcus (Tumour like parasite)

We have already covered this topic in the Section on Parasites which comes after this chapter. But it is mighty important to re-emphasize the significance of this parasite time and time again!

Echinococcus is by far a lot worse than cancer. But before I give you the reasoning see the pictures of this parasite first.

**(See section on Top Ten Parasites)**

Echinococcus is incredibly common. Including its smaller cousin Cysticercosis at least one in ten people are infected with this parasite. At least one in ten I must repeat it. And it could be a lot higher. As there are many, many different species of Echinococcus.

Now - understand why I put Echinococcus above cancer (only MND is worse at least at this stage):

- This parasite causes mechanical and almost certainly irreversible and often very extensive damage.
- The content of cysts is so toxic that even snakes venom struggles to match it.
- The parasite is used to tell people they have tumour when in fact they do not. And obviously the reason behind it is very simple - apply chemotherapy on Echinococcus. Which bring no improvement.
- When you have a surgery to remove it - if the content of the cysts bursts because of how toxic it is it simply leads to a death. It is very common to die during removal of Echinococcus.

What more to say - when you contract either of the two it often leads to a severe vomiting event. After contracting this parasite you gave about 3-6 months to get rid of it before the cysts form too large leading to a permanent mechanical damage.

Prevention is by far a lot more important than dealing with the consequences.

Unfortunate those who are diagnosed with this parasite may never see any improvement with Rife. Because damaged tissue cannot be repaired.

## 6. Dementia / Alzheimer

This is as obvious as it can get! Prions, Prions and Prions again.

Before we get any further lets give a few examples of most common prions / disease: Jacob Creutzfeldt Disease and Mad Cow Disease.

And the horrific thing is we think they do not exist. The fact is - prions exist in almost every undercooked meat or dairy.

Every piece of meat - medium rare - affect your brain by the fact that prions are almost certainly contaminating our food.

And they cannot be removed from our body with conventional methods.

But how many of you have this knowledge.

Prions are like heavy metals - the more you eat undercooked animal products the more likely you are to be assimilating this molecules.

And the outcome is very, very cruel. When your brain turns into a sponge - your bodily functions and memory go pear shaped leading to a very inhuman death.

And the since you are unlikely to remember anything the biggest burden and horror lies with your family.

And the care required to sustain you alive often ruins families. This is part of the whole system - the less you live to your children the better.

There is no need for it - Rife can eliminate prions with ease. Except the damage done can be irreversible. This is the only part of the problem.

Prevention is much better than treatment.

Lyme Complex plays also a major role in Alzheimers as well as many other agents but Prions are the main culprit in this equation.

## **7. Morgellons & Delusional Parasitosis**

There is nothing more horrific than Morgellons and MND. Both are caused by the same agent - the Nanotechnology.

One of the core symptoms of Morgellons is muscle twitching and all sorts of movements under the skin. Also skin lesions and other internal bleeding may develop.

This appears to be what they serve to the least subordinated minds on this planet.

This is how they punish those individuals who can resist their mind control.

Be very careful - as soon as you describe it to your doctor it will end up in your records for good.

And a lot more can happen because as soon as it is on your records you are a subject to Mental Health Act and they simply owe you.

They owe your body and they want to owe your mind back.

Never ever mention these sort of symptoms to doctors or on social media. See chapter on Mental Health Act.

## 8. MND / ALS

This is the purpose of this book!!! MND!!! What leads to it and how to prevent it. Lets repeat it again - the purpose of this research and the purpose of this book is to find cure for MND. Whoever finds the cure for MND will be able to cure any disease!!!

The Russian nesting Dolls (Matryoshka) are possibly the best way to describe the process leading to MND and Morgellons.

There are large things embedded in us like parasites (which obviously do not exist for Western Medicine and any other medicine) which then carry smaller and smaller thing.

Inside parasites we have bacteria which then carries something even smaller like a virus.

This is by the way why people die in large numbers in intensive care because antibiotic can and does release the virus which then kills. Hence you see an improvement in some patients for a day or two. And then on day three the patient is dead.

And finally - what this book is about - Nanotechnology or nano robots which are designed to take over from conventional pathogens in case if the patient became free from the disease.

Discredit - remember - this is all they have to do.

So - in case if you become free and in case if you exceeded your Date of Death they would activate this option. This may turn into MND or it may turn into Morgellons. This is the same thing for me anyway.

And MND is the latest experiment which is being tested so when they have a crown of people on the streets with pitch forks demanding answers then they can extinct us by activating MND in all of us. And within a few weeks most of us would be disabled and unable to cause trouble.

No need for the Biblical Flood to wipe us out of this planet. This is how it will be done. We will be extinguished like a candle.

This was my observation with people of a very high consciousness who could resist their technology - those people were triggered with MND and Morgellons.

Those who followed their electronic instructions forgot about Rifing and went back to their daily misery. This is the system surrounding us.

By why? - I believe this planet is nothing but a farm or a factory and we are nothing but cattle - quite literally. We are meat and nothing but meat.

And considering what we have done to this planet another human reset is a few years or perhaps even a few months away from happening.

Because this planet has to be saved and the only way to do it is by reducing our numbers to several millions. Something big is on the horizon and we will all witness it soon.
