

THE LAW OF FREQUENCIES

**MATHEMATICAL RULES IN
DEVELOPMENT OF UNIVERSAL
FREQUENCIES IN CURING DISEASES
INCLUDING
CANCER AND MND**

I have been sent back to complete my work commenced as Royal Raymond Rife.

This book is simply a personal vendetta of an unfinished business.

The Author

*“Make the lie big,
keep it simple,
keep saying it
and eventually they will believe it.”*

Nazi propaganda chief Dr Joseph Goebbels

“Insanity: doing the same thing over and over again and expecting different results.” (this is applicable to Chemotherapy...)

“No problem can be solved from the same level of consciousness that created it.”

“Logic will get you from A to B. Imagination will take you everywhere.”

Albert Einstein

Nikola Tesla quotes (as if all of them were taken out of my mind....):

“If you want to find the secrets of the universe, think in terms of energy, frequency and vibration.”

“I don't care that they stole my idea. I care that they don't have any of their own”

“The scientists of today think deeply instead of clearly. One must be sane to think clearly, but one can think deeply and be quite insane.”

“The day Science begins to study non-physical phenomena, it will make more progress in one decade than in all the previous centuries of its existence.”

“The present is theirs; the future, for which I really worked, is mine.”

“My brain is only a receiver, in the Universe there is a core from which we obtain knowledge, strength and inspiration. I have not penetrated into the secrets of this core, but I know that it exists.”

“I do not think there is any thrill that can go through the human heart like that felt by the inventor as he sees some creation of the brain unfolding to success . . . Such emotions make a man forget food, sleep, friends, love, everything.”

“All that was great in the past was ridiculed, condemned, combated, suppressed – only to emerge all the more powerfully, all the more triumphantly from the struggle.”

“Today’s scientists have substituted mathematics for experiments, and they wander off through equation after equation, and eventually build a structure which has no relation to reality. ”

“What one man calls God, another calls the laws of physics.”

“If you only knew the magnificence of the 3, 6 and 9, then you would have the key to the universe.”

“You may live to see man-made horrors beyond your comprehension.”
- Western Medicine

“The scientific man does not aim at an immediate result. He does not expect that his advanced ideas will be readily taken up. His work is like that of the planter – for the future. His duty is to lay the foundation for those who are to come, and point the way. He lives and labors and hopes.”

“My method is different. I do not rush into actual work. When I get an idea I start at once building it up in my imagination. I change the construction, make improvements, and operate the device entirely in my mind.”

“Most certainly, some planets are not inhabited, but others are, and among these there must exist life under all conditions and phases of development.”

“There were many days when [I] did not know where my next meal was coming from. But I was never afraid to work, I went where some men were digging a ditch ... [and] said I wanted to work. The boss looked at my good clothes and white hands and laughed to the others ... but he said, “All right. Spit on your hands. Get in the

ditch.” And I worked harder than anybody. At the end of the day I had \$2”

“The scientists from Franklin to Morse were clear thinkers and did not produce erroneous theories. The scientists of today think deeply instead of clearly. One must be sane to think clearly, but one can think deeply and be quite insane.”

“A new world must be born, a world that would justify the sacrifices offered by humanity. This new world must be a world in which there shall be no exploitation of the weak by the strong, of the good by the evil; where there will be no humiliation of the poor by the violence of the rich; where the products of intellect, science and art will serve society for the betterment and beautification of life, and not the individuals for achieving wealth. This new world shall not be a world of the downtrodden and humiliated, but of free men and free nations, equal in dignity and respect.”

“A new idea must not be judged by its immediate results.”

“Originality thrives in seclusion free of outside influences beating upon us to cripple the creative mind. Be alone-that is the secret of invention.”

“A telephone subscriber here may call up and talk to any other subscriber on the Globe. An inexpensive receiver, not bigger than a watch, will enable him to listen anywhere, on land or sea, to a speech delivered or music played in some other place, however distant.”

“Einstein's relativity work is a magnificent mathematical garb which fascinates, dazzles and makes people blind to the underlying errors. The theory is like a beggar clothed in purple whom ignorant people take for a king... its exponents are brilliant men but they are meta-

physicists rather than scientists.”

“My project was retarded by laws of nature. The world was not prepared for it. It was too far ahead of time. But the same laws will prevail in the end and make it a triumphal success.”

“Even matter called inorganic, believed to be dead, responds to irritants and gives unmistakable evidence of a living principle within. Everything that exists, organic or inorganic, animated or inert, is susceptible to stimulus from the outside.
