

XII. THE HOLY GRAIL

The quest for the Holy Grail is now over (January 2021). This is a revised version from 2020.

I have thought for a very long time that this might not be possible. But then I would deny myself at the end of this book by saying it.

Nothing is impossible. As soon as you start to think that something is impossible you will never get there.

The reason being why I have been taken over this many roads is very clear to me now. Every piece of discovery I have made or I was telepathically given had its purpose. And all these pieces had to be amalgamated into that one single number.

And to find that magic number is not only to cure one or two diseases. This number will give us a multiple answers to many, many questions in not only medicine but also in physics.

ALWAYS THINK - NOTHING IS IMPOSSIBLE!

So - this is the latest frequency - the Holy Grail. This number has resonated for over 4 months now removing layers of nano and pico or even femto or smaller technology one by one:

584069724426078

Or to round it up you can simplify it to:

58407 or 58.407 or 58.407

Why is the processor of removal of nanotechnology so long and so complicated - please refer to the chapter - NANOSLAVERY for clarification. The process of peeling off the nano layers can be as long as 20 weeks.

In order to cover the calibration issues with your frequency generator apply below frequency continuously for over 20 weeks. If you see no desired outcome you need to broaden the range as many brands could be manufactured by Big Pharma for one reason only - to discredit this discovery.

58.38Hz

-

58.43Hz

How do I know it is correct - firstly read all of the Chapter XVI on Nanoslavery in order to understand how lengthy this process will be.

Now - like everything in my life I get to do a rather unorthodox things - through archery to writing this book. To Rife and Vega. Full medical study of Proper Medicine. And lately - bee keeping. Fascinating to watch 40 thousand bees working for only one queen. Isn't the same with us humans??? Fascinating how we are identical to the bees.

But that is not the point of this conversation. The point of this is that bee keeping was the path to deciphering the biggest clue they gave us to understand how to defeat this machine. And the clue with the bees is - my hive swarmed twice that summer. Very unusual but if you Rife your bees they will exceed all expectations. So I lost two queens and the third one I am guessing became trapped above the excluder and never mated. In effect the colony became infertile and prone to wasps and some other bee „predators”.

Guess what was the one which affected my bees - The Great Wax Moth. The moth left a complete devastation inside the hive. See it on this picture:

And that came with the Eureka moment - look at this movie poster:

There are a few of things here to understand:

1. „The Silence of the Lambs” - why put a moth on a movie poster where animal LAMB is the key word??? Well?
2. Look closely at the moth - what do you see? - It's a very distinct type of a moth - with a SCULL on the back of it. The scull is the symbol of how they are culling us freely without any opposition. And we are symbolic lambs.
3. Combine these two and you can clearly understand that the moth is the key to unlock the spell. The frequency of the moth is the holy grail. The frequency of the moth can destroy the nanotechnology.
4. And this poster shows us how the nanotechnology silences us and this is how they enslaved us lambs. This frequency is the key to freedom. This frequency has been incorporated within the 58407. So far - 18 weeks on - it's still working and removing nano.

DOES IT MAKE SENSE? YES, IT DOES.
