

XVI. NANOSLAVERY

I had a very interesting conversation before Christmas 2020 with one very enlightened individual who only enforced my theory which will be explained shortly. I will also leave little doubt that my concept should be correct as there is no other logical explanation - this is also how you prove things in mathematics.

So here it is - nanotechnology and pico technology or smaller is an integral part of our DNA structure!

Was it always the case - the answer is probably - No.

But before we look at the small detail we need to understand what is nanotechnology or what it looks like. The first thing is to look at the movie Terminator - look at this pictures:

A liquid metallic-organic hybrid. Totally independent artificial intelligence. DO you have any doubts or do you want to insinuate this is science fiction - then read this articles:

You can see it here: <https://youtu.be/581PK3s0HgA> and her: <https://www.youtube.com/watch?v=g2rMkRs-GzE> and here: <https://www.youtube.com/watch?v=RfeQ9ipVh84>

These are real human achievements. Now - imagine the world 1000 years ahead of now. You probably cannot, can you?! And there is no doubt this planet belongs to someone so this someone has taken certain steps to have a control over all of the species living in this bubble.

So - lets analyse a few additional facts.

Like Anthanasius Kircher (and many others after him) who firstly laid claims that the diseases are caused by small invisible „worms” he watched under the microscope back in mid 1600s’ - I believe that NANOTECHNOLOGY was implanted in us with the purpose to age our body and to kill us eventually. Nanotechnology is an integral part of our human DNA structure.

Whoever is behind it it has also developed a technology designed to recycle our consciousness after we die - or reincarnation as we commonly know it. They can also create new consciousness like what we are already attempting in our labs.

Now, all we have to do is to imagine that this nano or pico technology is nothing else but Artificial Intelligence which can be controlled remotely with now 5G or 6G (military installations) or more advanced.

Imagine that this is also a secondary circuit breaker in case if a biological infection gets removed somehow with Rife technology. In such a case these tiny little robots as small as atoms or even smaller can be programmed to fool our immune system by recreating the same biological virus or bacteria.

This is not a SCI-FY. We are living in the era of digital pathogens or digital replicas of biological pathogens. Like with music - we have an analog and digital versions - the same is in the world of so called absurd Western Medicine. We have biological viruses and we have

digital copies. And the digital are controlled remotely with 5G. This is what Kovid is precisely.

All of this was designed for those in charge of this planet to have full powers over what science can see a day light. All they have to do is to discredit any scientist with means of digital medium like liquid - semi autonomous nanotechnology.

And this is not just applied to control disease and ageing but also this technology is directly connected to our brain and consciousness. They can simply simulate what you think, what you say, what is your favourite colour. They can manipulate your emotions. They can absolutely control everything.

We are nothing but a sheep awaiting a slaughter. And if you cannot see it then you are a sleeper. There is no other conclusion - this planet is nothing but a prison or a concentration camp and the best way to run a prison is if the prisoners have no clue they are imprisoned. Exactly like in The Truman Show movie.

The humanity used to dwell on this planet for a very long time until about 60 thousand years ago when this planet was visited by certain extraterrestrial species. Which then enslaved our human race.

What was the purpose behind it? Multiple - gold mining, blood supply used for extending their life expectancy, other hormones and enzymes, pure greed, food production - possibly our human body is no different to how we define beef or lamb. Also to be considered - human body energy of various kind.

This is almost certainly the case with many hundreds or thousands of other planets in this galaxy alone.

Now imagine if you could regain freedom from nanotechnology? Imagine if your mind could be freed? Imagine the strength of our mind and what it can do and how fast we could evolve if we were not controlled. Our science is under full control. Our medicine is under full control. Everything is controlled by whoever enslaved our body and mind.

My other concept which is obviously beyond most to comprehend is - if we can use one single frequency to cure anything by removing the nanotechnology we should become immortal in due process by default. Or at least extend our life expectancy by 100 as a minimum.

Now lets explain for everybody why you may see no rapid effect with Rife when eliminating nanotechnology. Because nano is an integral part of our DNA the removal of it in a short period of time could be fatal. Even for a very healthy human.

And because nanotechnology is so advance it's like a liquid mass from the Terminator movie. You must imagine that while using cold melting to break it apart it can remould itself into less advanced substance.

To give you a comparison you need to imagine holding a kaleidoscope and spinning it one a week. Each time you get a very different picture - yet in my vie each time one of the shapes inside the picture is being removed until eventually the substance is deactivated.

As you can see - this creates a perfect mosaic. This process has to be repeated some 20 times or longer. Each week the molecular frequency of this substance is reprogrammed. So each week you can only remove one layer of the molecular connections of this agent.

Each time you do so you may expect a very harsh herx. From my personal experience if I was to overlap pain and symptoms of herx

even being free from other agents I doubt I could survive the compressed effect of this herxing.

Therefore the Rifing of this Nanotechnology has to be done gradually and over a long period of time - probably at least 20 weeks or longer. Patience is needed and full understanding of the above concept. How do we know how long it may take - the movie *Swordfish* is the possible answer. Like everything - messages are encoded in movies. How many elements can you see in the worm? This is the clue.

Additionally - I believe they use our bodies to incubate something else. It's difficult to describe it but it appears our bodies host their goo or something else which is perhaps part of the energy extraction system. This appears to be a living substance and with means to communicate through Morgellons fibres which we all have.

Conclusion - if we were to regain the freedom they would have to shut this down. And perhaps this process has been already initiated...

One other fascinating way of controlling us with use of nanotechnology is being able to project different things in our dreams. Some of them are e.g. visitations of other beings from other universes or dimensions in our mind during our sleep or lucid dreaming. This is another way to implant fear in our heads designed to stop Rifing with the latest frequency. Be warned - this may happen to you!

You may start to see things you had not seen before - some of you will think it's a blessing. Some of you will think it's evil. Some of you will enjoy it. Some of you will want nothing to do with it and you will make a decision to stop Rifting to avoid further visions.

Some of you will think that the visions are real, but my view is to treat them as only visions to start with. Everything in this game is designed to make you stop Rifting! Because your body belong to them and the mind is design to control the body.

So - be warned. It will take at lest 20 weeks and it will be a rollercoaster where this substance will reinvent itself several times with some of your medical symptoms only to put doubt in your mind and make you stop.
