

## XVII. THE VITRUVIAN MAN

Towards the end of 2020 I have made a few independent discoveries (or they were telepathic messages) with no knowledge of existence or past publications. They will provide complete new dimension to all of the discoveries to date.

As we know and you will argue without actually putting any thought to it - practically everything in the main stream books is a lie. This also includes Yoga or more precisely the Lotus Pose.

One must be blind not to see that what you have been shown and taught (I never did in my life any yoga for which I'm very happy about) has again been designed to point you in the wrong direction. So lets analyse it - have a look at these two pictures:

As you can see on the left - the figure of a triangle. And on the right (look at the circle) the figure of a pentagram or the neurones connection or the sun. What is interesting about the circle in the picture on the right is that our limbs were designed not no spread any more. To be precise the legs will not go naturally any wider (without months of exercising) and the arms cannot be lifted up beyond that angle (presuming they are stretched backwards and palms facing down).

What is the difference? The triangle confines the energy within your body whereas the Vitruvian Man and the circle position riches out to the space.

In the first case you are prevented from recharging your body. In the second - the energy flows through arms and head which leads to intersecting of the flow through the heart area.

We can also look at these pictures to show you what I have in mind:

Everything you know is designed to fool you! Left - recycle sign. Middle & Right - the neurones in brain and a radiating star.

The conclusion is very simple - Da Vinci was a genius and probably even him and then in his times he didn't know what he discovered. But my mind deciphered the clue. The difference is the Lotus Pose is the preventative pose. Preventative from elevating your consciousness to higher levels whereas Vitruvian Man is the opposite.

Even more than that! Imagine if you didn't need to eat! Imagine if you could just charge your body up by absorbing endless amounts of energy from ether. Practise this position and you will notice that your food intake will be reduced by a massive amount.

Food is a poison. No matter what it is. It makes us age. Eating should be only by means of pleasuring our tasting butts and not to sustain our bodily functions.

There are concrete archeological discovery about Tartarian Empire where very advanced dwellings and structures have no toilets of any

kind. This civilisation was very advanced and the thought that there were zero provisions for needing a Number One or Number Two leads me only to conclude that they had to know how to eliminate the need for food intake.

The same principle should be applied in case of space travel - having means to avoid taking food with you would be fascinating. Perhaps some of the latest movies show us in e.g. Mandalorian, Startreck, Star Wars - where most of characters do not consume any food or drink. Especially when on a space vessel.

Unthinkable - think nothing is impossible. And perhaps our bodies if freed from nanotechnology can become Perpetuum Mobile Machine!
