

## **HOMEOPATHIC RESONANCE**

One of the latest discoveries in science is use of homeopathic doses of electromagnetic field rather than applying massive EMF output associated with plasma generators and zappers. The homeopathic approach is as effective or possibly even more effective in application.

Unlike normal EMF which can harm, applying almost undetectable EMF is 100% safe for the body.

## **SUGGESTED APPLICATIONS**

Nanotechnology - break down Morgellons - break down  
5G Shielding Against  
EMF Shielding Against  
Geopathic Stress Shielding Against  
Aura Restoration  
Schumann Field Restoration  
Age Deceleration

## **CONTRAINDICATIONS**

There are no contraindications in who can use this device. The device does not exceed in emitting EMF (electromagnetic field) of that of the bioelectric circuitry of a human cell.

The EMF emitted by this device is no greater than most of the house appliances, telephone masts or any other electrical installation surrounding our living spaces. Additionally - there are no direct connection(s) to the circuit board of the device hence if used correctly as in the manual the user cannot be exposed to any form of electrocution.

It is therefore deemed that this device is safe in use by anybody - no matter what the physical or mental state the person is in.

## **UNIVERSAL FREQUENCIES**

**For those who do not know where to begin we suggest to look into the concept of universal frequencies.**

To find out more on how to compress multiple frequencies into one single universal number browse the link below.

Imagine if you could use one single frequency to solve every problem?

## **DISCLAIMER**

The Black Box LFG is nothing but a simple frequency generator with no software or preset frequencies or programmes in the menu. TBB LFG was designed based on SWEEPER device and with cooperation with Enso Electronics Ltd.

The device TBB LFG is not a medical device. The use of the device in any medical applications if undertaken by the person purchasing the product are at their full responsibility.

The manufacturer and distributors do not take any responsibility for individuals who choose to use this device in any such alleged applications and who may be making such claims.

Price per unit £600
