

THE BLACK BOX LFG II (LOW FREQUENCY GENERATOR)

The Black Box LFG II is a new generation of a frequency generator. It has been designed to replace old generation of so-called zappers / Rife machines where direct connection with electrodes or induction loop were standard requirement. TBB LFG II has similar elements except they were built in inside the casing.

The device was developed with a thought of creating a tool enabling removal of nanotechnology which was implanted in every human being with use of e.g. chemtrails and vaccinations.

THESE ARE THE DESIGN ADVANTAGES OF THE BLACK BOX LFG II

- Small in size - approximate in size of your mobile phone which means you can take it with you anywhere you like (unlike plasma generator)
- Working range from 1.00Hz or 30.00kHz
- Proven working range - 1.5m
- Unproven working range with homeopathic approach - possibly as far as 4-6m
- Application for the entire family in one go - as long as all of the members are gathered in one room
- Freedom from electrodes, loops and other wiring and laptop connections
- Charging and use function. Up to 72h on a single programme
- Color touch screen
- The above parameters make The Black Box close to being on par with plasma generators - except - the size and the price cannot be beaten.

WORKING RANGE

The working range of TBB LFG II is programmable between 1.00Hz to 30kHz. The device can also be programmed to sweep between specified two values - e.g. 58.40 - 58.42Hz.

Similarly to other devices with similar applications the calibration tolerances of TBB LFG II is set at 0.05%. This translates to +/-0.025Hz proportionate to 100Hz.

It is important to understand that because of the above - working with high frequencies may be very ineffective.

According to the latest scientific research - using frequencies between 10Hz and 100Hz could be the most effective approach. And possibly this is why the use of resonance in high frequency applications has failed so many people leading to disappointment.

HOMEOPATHIC RESONANCE

One of the latest discoveries in science is use of homeopathic doses of electromagnetic field rather than applying massive EMF output associated with plasma generators and zappers. The homeopathic approach is as effective or possibly even more effective in application.

Unlike normal EMF which can harm, applying almost undetectable EMF is 100% safe for the body.

SUGGESTED APPLICATIONS

- Nanotechnology - break down Morgellons - break down
- 5G Shielding Against
- EMF Shielding Against
- Geopathic Stress Shielding Against
- Aura Restoration
- Schumann Field Restoration
- Age Deceleration
- Sleeping Disorders

CONTRAINDICATIONS

There are no contraindications in who can use this device. The device does not exceed in emitting EMF (electromagnetic field) of that of the bioelectric circuitry of a human cell.

The EMF emitted by this device is no greater than most of the house appliances, telephone masts or any other electrical installation surrounding our living spaces.

Additionally - there are no direct connection(s) to the circuit board of the device hence if used correctly as in the manual the user cannot be exposed to any form of electrocution.

It is therefore deemed that this device is safe in use by anybody - no matter what the physical or mental state the person is in.

UNIVERSAL FREQUENCIES

For those who do not know where to begin we suggest to look into the concept of universal frequencies.

To find out more on how to compress multiple frequencies into one single universal number browse the link below.

Imagine if you could use one single frequency to solve every problem?

DISCLAIMER

The Black Box LFG II is nothing but a simple frequency generator with no software or preset frequencies or programmes in the menu. TBB LFG II was designed based on SWEEPER device and with cooperation with Enso Electronics Ltd.

The device TBB LFG II is not a medical device. The use of the device in any medical applications if undertaken by the person purchasing the product are at their full responsibility.

The manufacturer and distributors do not take any responsibility for individuals who choose to use this device in any such alleged applications and who may be making such claims.

RRP £800
